

Dropbox Announces Strategic Partnership

Dropbox

****FOR IMMEDIATE RELEASE**** **Dropbox Bolsters Enterprise Security with New Integration with CrowdStrike in San Francisco, CA – October 26, 2023** Dropbox today announced a strategic integration with CrowdStrike (Nasdaq: CRWD), a leader in cloud-delivered protection of endpoints, cloud workloads, identity and data. This partnership delivers enhanced security for Dropbox Enterprise customers by integrating CrowdStrike's Falcon platform threat intelligence directly into Dropbox's file collaboration environment. The integration provides real-time threat detection and automated remediation capabilities, helping organizations proactively protect sensitive data stored and shared within Dropbox. The collaboration addresses the growing need for comprehensive cybersecurity solutions in today's hybrid work environment. By leveraging CrowdStrike's advanced threat detection capabilities, Dropbox Enterprise users will benefit from enhanced visibility into potential threats, including malware, ransomware, and phishing attempts. The integrated solution will automatically quarantine suspicious files and alert administrators, minimizing the impact of potential security incidents. This proactive approach to security allows organizations to maintain a secure and compliant file-sharing environment without disrupting workflows. This integration builds upon Dropbox's existing robust security features, including data encryption, access controls, and activity monitoring. By combining these internal capabilities with CrowdStrike's external threat intelligence, Dropbox aims to offer its enterprise clients a comprehensive security posture that addresses both internal and external threats. "At Dropbox, we are committed to providing our customers with the most secure and reliable file collaboration platform possible," said Drew Houston, CEO of Dropbox. "Integrating with CrowdStrike allows us to extend our security capabilities, providing real-time threat detection and automated remediation that helps our enterprise customers stay ahead of the evolving threat landscape and protect their most valuable assets." Dropbox is a leading global collaboration platform that's transforming the way people work together. With more than 700 million registered users across approximately 180 countries, Dropbox helps teams of all sizes unleash their creative energy, solve problems, and scale their business. From simple file sharing to document collaboration and workflow automation, our platform is designed to reduce busywork so users can focus on the work that matters. Contact: support@dropbox.com
