

Services Brochure

Optimize Your Network Edge with Cisco Edge-as-a-Service In today's dynamic digital landscape, maintaining a competitive edge demands agility and optimized performance at the network edge. Beyond core networking hardware, Cisco offers a comprehensive Edge-as-a-Service (EaaS) portfolio, enabling you to unlock new business value without the complexities of traditional infrastructure management.

****Transform Your Edge with Cisco's EaaS Offerings:****

- * **Cisco SD-WAN as-a-Service:**** Centrally manage and optimize your Wide Area Network (WAN) across multiple locations with our cloud-managed SD-WAN solution. This service includes proactive monitoring, automated configuration, and real-time traffic shaping, ensuring optimal application performance and user experience. We handle the underlying infrastructure, allowing your IT team to focus on strategic initiatives. Target clients include enterprises with distributed branch locations, retail chains, and organizations needing secure and reliable connectivity for remote employees.
- * **Cisco Secure Access Service Edge (SASE) as-a-Service:**** Embrace a cloud-delivered security architecture with our SASE solution. We integrate best-in-class security functions, like secure web gateway (SWG), cloud access security broker (CASB), and zero trust network access (ZTNA), directly into the network fabric. This simplifies security management, reduces latency, and provides consistent protection across all users and devices, regardless of location. Ideal for organizations prioritizing data protection and regulatory compliance.
- * **Cisco Meraki Managed Services:**** Leverage the simplicity and power of the Cisco Meraki platform with our managed services offering. From network design and deployment to ongoing monitoring and support, our certified Meraki experts handle all aspects of your Meraki environment. This allows you to focus on your core business while ensuring optimal network performance and security. Perfect for small to medium-sized businesses and educational institutions seeking a hassle-free networking solution.

****Our Service Delivery Approach:**** We employ a proven methodology based on ITIL best practices and Cisco's extensive experience. Our EaaS solutions are delivered through a combination of remote monitoring, proactive maintenance, and on-site support as needed.

****Success Measured in Outcomes:**** Our success is tied to your success. We track key performance indicators (KPIs) such as network uptime, application performance, and security incident response times to ensure we are meeting your

objectives. Cisco EaaS solutions are backed by industry-leading service level agreements (SLAs) and supported by our global network of certified professionals holding certifications such as CCIE and DevNet. Cisco also partners with leading cloud providers, ISVs, and security vendors to deliver comprehensive and integrated solutions.
