Atlassian Compass: Your North Star for Distributed Architecture **Navigating the complexities of modern microservices and distributed architecture? Atlassian Compass provides a centralized, collaborative platform to tame the chaos and empower your engineering teams.** Compass is more than just a service catalog. It's a comprehensive developer experience platform designed to improve software health, reduce cognitive load, and foster ownership within your teams. **Unlock unprecedented visibility and control:** * **Centralized Component Registry:** Automatically ingest component metadata from your CI/CD pipelines, code repositories, and cloud providers. Effortlessly track service owners, dependencies, and critical metrics in one unified view. * **Scorecards & Health Metrics:** Define custom scorecards tailored to your organization's specific needs. Automatically track crucial metrics like deployment frequency, code coverage, security vulnerabilities, and API response times, providing a clear picture of component health. * **Extensible Tool Ecosystem:** Integrate seamlessly with your existing development tools like Jira, Bitbucket, PagerDuty, and more. Trigger actions based on scorecard results, automate incident response, and streamline your workflows. * **Real-time Collaboration:** Enable effective communication and collaboration around components with built-in comment threads, activity feeds, and dedicated spaces for documentation and discussion. **Who benefits from Compass?** Compass is ideal for: * **Engineering Managers:** Gain a holistic view of system health, identify bottlenecks, and proactively address potential issues. * **Developers:** Reduce context switching, quickly find relevant information, and confidently deploy code with improved visibility into dependencies. * **SREs:** Automate incident response, improve service reliability, and proactively identify potential outages. **Compass Advantage:** Unlike fragmented monitoring tools, Compass offers a unified and collaborative experience, fostering a culture of shared ownership and proactive problem-solving. By connecting your existing tools and processes, Compass empowers your teams to build and maintain resilient, scalable, and high-performing distributed systems. **Start your journey towards architectural clarity today. Visit [Atlassian.com/Compass](https://atlassian.com/compass) to learn more and request a demo.**
