

# Oracle Expands Operations

## Oracle

**\*\*FOR IMMEDIATE RELEASE\*\*** Oracle Announces General Availability of Oracle Autonomous Database Serverless in Frankfurt, Germany\*\* **REDWOOD SHORES, Calif. – October 26, 2023\*\*** – Oracle today announced the general availability of Oracle Autonomous Database Serverless in its Frankfurt, Germany cloud region. This expansion enables European customers to leverage the industry-leading Autonomous Database capabilities with pay-per-use pricing for a wide range of workloads, including data warehousing, transaction processing, and JSON Document Database applications, while addressing data residency requirements. The deployment of Autonomous Database Serverless in Frankfurt provides European organizations with a critical advantage: the ability to store and process sensitive data within the EU, adhering to stringent regulations like GDPR. This removes a significant barrier for companies in sectors such as financial services, healthcare, and government, who require strict data sovereignty controls. Furthermore, the Serverless deployment model provides elastic scaling, automatically adjusting compute and storage resources based on demand, optimizing costs and eliminating the need for manual database administration. This lowers operational costs for customers using machine learning and AI and allows them to focus on innovation. The availability of Autonomous Database Serverless in Frankfurt is part of Oracle's continued investment in expanding its global cloud infrastructure. This further strengthens Oracle's ability to deliver secure, high-performance cloud services to customers worldwide. It also enables customers with global deployments to leverage a consistent Autonomous Database experience across multiple regions. "We are committed to providing our customers with the most advanced cloud solutions that meet their evolving needs, including data sovereignty and cost optimization," said Clay Magouyrk, Executive Vice President, Oracle Cloud Infrastructure. "Bringing Autonomous Database Serverless to Frankfurt is a testament to that commitment, empowering European businesses to unlock the full potential of their data while adhering to crucial regulatory requirements." **About Oracle** Oracle offers integrated suites of applications plus secure, autonomous infrastructure in the Oracle Cloud.
