Microsoft

Services Brochure

Unlock Untapped Potential: Optimizing Your Microsoft Investment While Microsoft Azure powers your infrastructure and Microsoft 365 boosts productivity, are you maximizing the full value of your technology investment? Microsoft Professional Services offers a comprehensive suite of specialized services designed to optimize your cloud journey and unlock hidden efficiencies. **Beyond the Core: Strategic Value-Added Services** * **Microsoft Cybersecurity Solutions Group:** Protect your digital assets with our proactive security services. We go beyond basic threat detection, offering specialized assessments, incident response planning, and red-teaming exercises to identify vulnerabilities and build resilience against sophisticated cyber threats. Our target market is enterprise organizations in regulated industries like finance and healthcare. * **Data & AI Innovation Workshops:** Transform your data into actionable insights with our immersive workshops. These tailored engagements equip your data science teams with the latest Azure AI and Machine Learning tools, best practices, and guidance on building custom AI solutions for specific business challenges, like predictive maintenance or customer churn analysis. Our target market is mid-sized to large enterprises with existing data science teams looking to accelerate AI adoption. * **Microsoft Accessibility Consulting:** Ensure inclusivity and compliance with our comprehensive accessibility assessments. We leverage the Accessibility Insights toolkit and WCAG standards to audit your websites, applications, and digital content, providing actionable recommendations for improving accessibility and reaching a wider audience. Our target market is public sector organizations and enterprises prioritizing ethical and inclusive technology design. **Our Delivery Approach: Collaborative & Results-Driven** We employ a proven collaborative methodology, starting with a detailed needs assessment and culminating in a tailored solution delivered by certified Microsoft experts. Our engagements are governed by ITIL best practices and focus on knowledge transfer, empowering your internal teams to manage and optimize your solutions long-term. **Measuring Success: Quantifiable Impact** We measure success based on quantifiable results, including improved security posture (e.g., reduced incident response time), increased AI adoption rates, and enhanced accessibility scores. Our Cybersecurity Solutions Group holds certifications like CISSP and CISM. Our extensive partner network, including strategic alliances with firms like Accenture and Avanade, allows us to scale our

services to meet the needs of even the most complex global organizations.
