Stripe

Product Brochure

Stripe Treasury: Banking-as-a-Service for Platforms **Empower Your Platform & Unlock New Revenue Streams** Stripe Treasury lets you embed financial services directly into your platform, turning your user experience into a comprehensive business solution. Offer your sellers, freelancers, or creators integrated banking and financial management tools without the complexity of building them from scratch. **Beyond Payments: A Holistic Financial Ecosystem** * **Customized Financial Accounts:** Issue branded debit cards (physical and virtual) and offer FDIC-insured checking accounts, seamlessly integrated within your platform's interface. Automate payouts, manage funds, and streamline expenses – all under your brand. * **Instant, Automated Payouts:** Eliminate delays and empower your users with immediate access to their earnings. Offer payouts through ACH, wires, or Stripe balance, configurable based on individual user needs and platform settings. Reduce churn by giving users more control over their funds. * **Simplified Financial Management:** Enable users to track balances, review transactions, and reconcile payments directly within your platform. Reduce support burdens and foster financial transparency. * **Integrated Reporting & Compliance:** Benefit from robust reporting tools for tracking payment flows, user activity, and overall program performance. Leverage Stripe's compliance expertise to navigate regulatory complexities. **Ideal for Marketplaces, SaaS Platforms, and Creator Economies** Stripe Treasury is designed for platforms looking to: * Enhance user retention and attract new customers. * Increase revenue by offering premium financial services. * Simplify payouts and improve cash flow for their users. * Reduce operational overhead associated with managing financial relationships. **The Stripe Advantage: A Unified Financial Infrastructure** Unlike fragmented solutions, Stripe Treasury offers a fully integrated platform with powerful APIs, developer-friendly documentation, and world-class support. This reduces integration time, minimizes development effort, and provides a secure, scalable foundation for your financial services. Leverage Stripe's robust fraud prevention, KYC/AML capabilities, and global payment network for a seamless, compliant, and reliable experience. Offer a comprehensive suite of financial tools to your users and future-proof your business with Stripe Treasury.
