Secure Your Future with Cisco SecureX: The Platform for Unified Security Operations

Cisco SecureX: Your interconnected security platform, delivering unmatched visibility, automation, and orchestration across your entire security infrastructure. In today's complex threat landscape, fragmented security tools create gaps and increase response times. Cisco SecureX tackles this challenge head-on, integrating your existing Cisco and third-party security technologies into a unified platform. Imagine a single pane of glass where you can see, understand, and act on threats faster and more effectively. **Key Features and Capabilities:** * **Integrated Threat Intelligence:** Leverage Cisco Talos Intelligence, one of the world's largest commercial threat research teams, for real-time threat intelligence updates directly within SecureX. Stay ahead of emerging threats with actionable insights and proactive defenses. * **Automated Threat Response:** Automate repetitive tasks and accelerate incident response with customizable playbooks. Trigger automated actions like isolating compromised endpoints, blocking malicious URLs, and updating firewall policies. * **Cross-Domain Visibility:** Gain comprehensive visibility across your network, endpoints, cloud environments, and applications. SecureX aggregates and normalizes security data from diverse sources, providing a unified view of your security posture. * **Case Management & Collaboration:** Streamline incident investigation with built-in case management capabilities. Collaborate with your security team, track progress, and document findings within a centralized platform. * **Open APIs & Integrations:** Seamlessly integrate with your existing security tools and workflows through SecureX's open API. Extend the platform's capabilities and create a truly customized security solution. **Target Customers & Use Cases:** Cisco SecureX is designed for enterprise security teams seeking to consolidate their security operations, improve threat detection and response, and reduce operational costs. Ideal for organizations with: * Multiple security tools from various vendors * A need to improve incident response times * A desire to automate security workflows **Competitive Advantages & Unique Value:** SecureX offers a unique value proposition by: * Providing a unified security platform built on Cisco's industry-leading security portfolio. * Offering native integrations with Cisco security solutions, simplifying deployment and management. * Leveraging Cisco Talos Intelligence for unmatched threat intelligence capabilities. * Delivering open APIs for seamless

integration with third-party tools and workflows. **Key Metrics:** * **Accelerate Incident Response:** Reduce incident response times by up to 95% through automation and orchestration. * **Improve Threat Detection:** Gain enhanced visibility and threat detection capabilities across your entire security infrastructure. * **Reduce Operational Costs:** Streamline security operations and reduce manual effort with automated workflows. **Secure your organization's future. Contact your Cisco representative today to learn more about Cisco SecureX.**
